**Letter of Recommendation**  
**Cardinal Engineering Associates, Inc.**  
99 Colony Street  
Meriden, Connecticut 06451

**To Whom It May Concern:**

Over the past 20 years Cardinal Engineering Associates, Inc. has provided engineering services to the City of Middletown for the design of a variety of projects including many roadway reconstruction, drainage, and sanitary sewer projects.

Recently, Cardinal Engineering completed the design of the City's combined sewer separation project in the urbanized areas of Middletown. This project included the installation of 5.5 miles of new storm sewers, the replacement of six miles of sanitary sewers and several miles of water mains, and the complete reconstruction of six miles of urban streets. Cardinal also provided contract administration and resident engineering services for ten separate construction contracts for this project and for many other construction projects in Middletown.

Cardinal Engineering has shown themselves to be highly qualified in the design and administration of public works projects. I would highly recommend this firm to provide on-call civil engineering services to the City of New Britain.

If you have any questions or would like additional information, please feel free to contact me at 860-344-3411.

Sincerely,

  
Robert J. Dolmeier, P.E.  
Deputy Director of Public Works
