Letter of Recommendation  
Cardinal Engineering Associates, Inc.  
99 Colony Street  
Meriden, Connecticut 06451

To Whom it May Concern:

For over 35 years, Cardinal Engineering Associates, Inc. has supported the City's need to develop and improve its infrastructure. From park design work, to road reconstruction, to sewer and drainage design and inspection, the work of this firm has always been professionally performed.

It is a pleasure to work with their staff on projects that are developed and designed in detail and with care. The accurate cost estimating and the completeness of the plans have helped us complete the projects on time and within budget with very few change orders. As a City that has utilized many consulting firms, Cardinal Engineering Associates has been one of the few that have demonstrated continued service excellence.

Particularly noteworthy, has been the communication that Cardinal Engineering demonstrates throughout the process of design or construction. This strength of this firm makes it easy for decisions to be made and allows for success to be easily attained. I personally appreciate the understanding they have of the City's needs and our professional relationship. I sincerely wish them continued success.

Sincerely,

Richard H. Miller, P.E., L.S.  
Director
